GRAPHIC DESIGN & ILLUSTRATION

## A BIT ABOUT ME

My passion for art has always been a part of my life. It began early when I started creating and sketching original characters at a very young age. This love for art continued to grow and led to my decision to attend Oakland University where my artistic studies culminated with a Bachelor's Degree in Graphic Design and Studio Art.

Through the years, I have learned to work with many computer programs including Adobe Illustrator, Adobe Photoshop, and CorelDraw on both PC and Mac. I have also become talented in sketching, drawing, painting, and web design including designing my own online portfolio. I manage each project in a timely manner while multitasking on many assignments.

My recent side projects include custom designed wedding invitations and a children's book. My passion for graphic design and illustration creates a stronger artist in me every day and I seek opportunities that will continue to be challenging.
